CHOICE OF A HIGHER EDUCATION PROGRAM

Decision determinant in the future career but:

- a huge variety of higher-education programmes is available
- different future employability
- program that leads to a certain career isn't always clear
- most of the programs web-pages don't state clearly the competences they provide

PROBLEM

How to use alumni and job posts information to recommend higher education programs appropriate to achieve a certain job?

GOAL

Higher-education program
recommendation system

LITERATURE REVIEW

RECOMMENDER SYSTEMS

Active user → **User**

Users → **Alumni**

Items → **Higher-education programs**

Item features → **Skills**

Preference/Like → **Having a certain skill**

TYPES OF RECOMMENDER SYSTEMS^[1]

Content-based - recommendations based on items the user has liked in the past.

Collaborative - recommendations based on items liked by people with similar preferences

Hybrid - combination of the two above

COLLABORATIVE RECOMMENDERS^[2]

Memory-based algorithms

Use the preferences to calculate the similarity between users and make predictions.

- Top-N recommendations^[3]

Model-based algorithms

Learn a model from the ratings to make predictions.
